

Observations of Environmental Auditor (V.V.P. Engineering college Rajkot) for GMDC Projects in 2009

- Overall housekeeping is found to be quite good and satisfactory
- The industry is continuously putting efforts to adopt better Environmental Management System to reduce ground level ambient air pollution
- Maintenance of data and records were found quite systematic and good
- Ambient air quality complies with the stipulated norms
- Safety measures like provision of earplugs are provided where high noise level is generated by heavy earth moving machineries. It is worth noting that workers / employees always use safety gadgets as and when required
